

**Strawman List of
EQR Product Names
for Discussion at 8/14/03 EQR UG Meeting**

Product Name	T	C	Strawman Definition/Notes	Users Group Comments
ENERGY IMBALANCE	X	X	Service provided when a difference occurs between the scheduled and the actual delivery of energy to a load obligation	
REACTIVE SUPPLY & VOLTAGE CONTROL	X	X	Production or absorption of reactive power to maintain voltage levels on transmission systems	
REGULATION & FREQUENCY RESPONSE	X	X	Service providing for continuous balancing of resources (generation and interchange) with load, and for maintaining scheduled interconnection frequency by committing on-line generation whose output is raised or lowered as necessary to follow the moment-by-moment changes in load.	
SCHEDULE SYSTEM CONTROL & DISPATCH	X	X	Scheduling, confirming and implementing an interchange schedule with other Control Areas, including intermediary Control Areas providing transmission service, and ensuring operational security during the interchange transaction.	
SPINNING RESERVE	X	X	Unloaded synchronized generating capacity that is immediately responsive to system frequency and that is capable of being loaded in a short time period	
SUPPLEMENTAL RESERVE	X	X	Service needed to serve load in the event of a system contingency, available with greater delay than SPINNING RESERVE	
SYSTEM BLACK START CAPABILITY	X	X	Service available after a system-wide blackout where a generator participates in system restoration activities without the availability of an outside electric supply. (May be renamed "Black Start Service.")
